

MEWPMate – Technical Data Sheet

Product Overview

MEWPMate is engineered to shield mobile elevating work platforms (MEWPs) from overspray, wet plaster, debris and general site contamination. Its core function is preventing build-up that leads to costly cleaning, premature wear, and avoidable downtime. By protecting the platform floor and rails, MEWPMate helps maintain machine condition and supports consistent fleet presentation.

2. Key Functional Benefits

Contamination Prevention: Shields floors, rails, and control boxes from plaster, paint, dust and debris. Reduces staining, corrosion and damage to sensitive components.

Hire-to-Hire Efficiency: Machines can be collected, checked and redeployed without returning to depot. Eliminates cleaning bottlenecks and reduces turnaround delays.

Reduced Cross-Hire Dependence: Cleaner machines remain fit for hire, reducing the need to cross-hire replacements. Protects hire margins and improves fleet availability.

Lower Cleaning Labour: Significantly reduces time spent removing plaster, paint and debris. Frees workshop staff for higher-value tasks.

Improved Customer Satisfaction: Cleaner, better-presented machines reduce complaints and improve customer relationships.

3. Safety & Site Efficiency Benefits

The enclosed platform design helps contain tools, materials, and debris, reducing the risk of dropped-object incidents. Benefits include fewer incidents, reduced risk of property damage, fewer work stoppages and more organised workspaces.

4. Material Construction

MEWPMate is manufactured from materials that are water-resistant, spark-resistant, FSC-grade and recycled and fully recyclable at end of life.

5. Operational Advantages

Faster Turnaround: Cleaner machines allow quicker inspections and redeployment.

Consistent Fleet Presentation: Maintains a uniform, professional appearance across fleets.

PROTECTIVE GLOBAL LTD
Protection • Safety • Compliance
105 – 115 Effingham Street
Rotherham
S65 1BL

Built for Repeated Hire Cycles: Reusable, simple to install and designed for real-world jobsite conditions.

6. Branding Options

MEWPMate can be customised with hire company branding, providing free visibility and a professional fleet appearance.

7. Installation & Use

Quick installation with no specialist tools required. Designed to fit a wide range of platform types. Replaceable between hires for rapid redeployment.

8. Commercial Impact Summary

MEWPMate helps hire companies keep more machines fit for hire, reduce cancelled deliveries, improve hire-to-hire strike rate and protect margins. End users benefit from fewer cleaning charges, reduced damage fees and lower downtime penalties.
